DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/3/2007 has been entered.

Election/Restrictions

2. Applicant's election without traverse of claims 13 and 31-43 in the reply filed on 7/17/2007 is acknowledged.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 13 and 31-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicant's Admitted Prior Art, namely Figs 1 and 2 and pages 1-7 of the specification of the present invention.

Regarding claim 13: See Figs 1 and 2 and section [003] with the ring interpreted as element 16.

Regarding claims 31-36: See Figures.

Art Unit: 1763

5. Claims 13, 32, 33, and 37-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohkase et al (US 5,536,918).

Ohkase et al teaches a susceptor (holding protrusions 31) see for example Figs. 14-18. The ring and extend portions are best illustrated in Figs. 14, 15, and 18. According to col.4 lines 17-23, the wafer holder 3 is made of SiC which is a known opaque material of construction. See also reinforcing ring 33 which links support units (extended portions) 30. Ohkase et al also teaches in section [0078] that ring 33 and units 30 are made of sapphire which is a material transparent to IR.
